DETAILED ACTION

1. In light of the new grounds of rejection as set forth below, the following action is non-final and thus, the finality of the previous office action has been withdrawn.

Claim Rejections - 35 USC § 102

2. The text of those sections of Title 35, U.S. Code not included in this action can be found in a prior Office action.

3. Claims 1 and 4-7 are rejected under 35 U.S.C. 102(b) as being anticipated by Kawamura et al. (U.S. 5,908,874).

Kawamura et al. disclose composition comprising 80-99% tungsten powder and remainder styrene rubber. There is also disclosed molded article made from this composition. Attention is drawn to example 4 which discloses composition comprising 92% tungsten and 8% styrene thermoplastic elastomer, i.e. styrene butadiene rubber (col.3, lines 37-39 and 44-48, col.4, line 53-col.5, line 2, col.5, line 65, and example 4).

Although there is no explicit disclosure regarding the surface hardness or specific gravity of the molded article, given that Kawamura et al. disclose molded article comprising identical type and amount of ingredients, it is clear that the molded article would inherently possess surface hardness and specific gravity as presently claimed.

In light of the above, it is clear that Kawamura et al. anticipate the present claims.

4. Claims 1, 3-7, 12, and 16-19 are rejected under 35 U.S.C. 102(e) as being anticipated by Sakaki et al. (U.S. 6,364,422).

Art Unit: 1714

The rejection is adequately set forth in paragraph 4 of the office action mailed 6/11/03 and is incorporated here by reference.

5. Claims 1, 4-7, and 16-19 are rejected under 35 U.S.C. 102(e) as being anticipated by Gallucci et al. (U.S. 6,300,399).

The rejection is adequately set forth in paragraph 4 of the office action mailed 12/23/03 and is incorporated here by reference.

Claim Rejections - 35 USC § 103

6. The text of those sections of Title 35, U.S. Code not included in this action can be found in a prior Office action.

7. Claims 3 and 12 are rejected under 35 U.S.C. 103(a) as being unpatentable over Gallucci et al. (U.S. 6,300,399) in view of Sakaki et al. (U.S. 6,364,422).

The rejection is adequately set forth in paragraph 4 of the office action mailed 6/11/03 and is incorporated here by reference.

8. Claims 16-19 are rejected under 35 U.S.C. 103(a) as being unpatentable over Sakaki et al. (U.S. 6,364,422) in view of Gallucci et al. (U.S. 6,300,399).

The rejection is adequately set forth in paragraph 7 of the office action mailed 12/23/03 and is incorporated here by reference.

37 CFR 1.131 Affidavit

9. The affidavit filed on 5/27/04 under 37 CFR 1.131 has been considered but is ineffective to overcome the Sakaki et al. (U.S. 6,364,422) and Gallucci et al. (U.S. 6,300,399) references.

10. The evidence submitted is insufficient to establish diligence from a date prior to the date of reduction to practice of the Sakaki et al. or Gallucci et al. reference to either a constructive reduction to practice or an actual reduction to practice.

Specifically, applicants did not rely upon JP 11-95712 when filing the US application and thus, applicants have not established constructive reduction to practice.

11. With respect to claims 16-19, it is noted that the evidence submitted in the 1.131 declaration, namely copy of JP 11-95712 and its English translation, is insufficient to establish conception and reduction to practice of the invention prior to the effective date of either Sakaki et al. or Gallucci et al. given that the 1.131 declaration is not commensurate in scope with the scope of claims 16-19. That is, present claims 16-17 disclose additional component added to the thermoplastic resin composition while claims 18-19 disclose additional component added to the molded article. However, there is no disclosure in the evidence or exhibit submitted in the 1.131 declaration of the conception and reduction to practice of thermoplastic resin composition or molded article that requires additional component as required in claims 16-17 or 18-19, respectively. There is no disclosure in JP 11-95712 of the additional ingredient required in present claims 16-19.

Response to Arguments

12. Applicants' arguments and declaration filed 5/27/04 have been fully considered but they are not persuasive.

Specifically, applicants argue that Sakaki et al. and Gallucci et al. cannot be used as references against the present claims in light of the 1.131 declaration filed 5/27/04 that establishes completion of the present invention of the present invention prior to the earliest US filing date of Gallucci et al.

However, for the reasons set forth in paragraphs 10-11 above, the 1.131 declaration is ineffective in removing either Sakaki et al. or Gallucci et al. as references and thus, Sakaki et al. and Gallucci et al. remain as relevant references against the present claims.

13. Any inquiry concerning this communication or earlier communications from the examiner should be directed to Callie E. Shosho whose telephone number is 571-272-1123. The examiner can normally be reached on Monday-Friday (6:30-4:00) Alternate Fridays Off.
